Helios By Elligint Health + Laguna

Helios Runs the Work.
Laguna Makes Every Conversation Count.

Conversational AI for Health Plan Care Management

Laguna Health builds conversational AI for payer care management. Its three products, Laguna Companion, Laguna Insight and LISA, work across the whole care conversation: reaching members, preparing care managers, guiding the live call, writing the documentation and reviewing every interaction for quality.

Three Products. One Intelligence Loop.

Laguna Companion
An AI Co-Piolot for Every Care Conversation

Companion gives care managers a quick member view before the call, surfaces member needs during it and drafts the documentation after it.

Laguna Insight
Quality Review on 100% of Calls

Insight scores every interaction against your own standards and turns the results into coaching, dashboards and data for accreditation reviews.

LISA
AI Agents for Routine Outreach and Support

LISA handles outbound calls and standardized screenings, then hands members to your team with a short briefing.

Works With Your Platform
Laguna runs on top of your current care management platform

No Integration Required
Zero integration required to go live

Record-Ready Summaries
Post-call summaries formatted for your system of record

Build Around Your Workflows
Configurable to your assessments, protocols and quality forms

Fast Go-Live
6 weeks or less, implementation go live timeline
